QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor :

F. PASQUILL

Vol. **88**, 1962

LONDON :
ROYAL METEOROLOGICAL SOCIETY
49 CROMWELL ROAD, S.W.7
1962

CONTENTS OF VOLUME **88**

PAGE

D. H. JOHNSON—Rain in East Africa 1

R. P. PEARCE—A simplified theory of the generation of sea breezes 20

W. C. MACKLIN—The density and structure of ice formed by accretion (Plates I-II) .. 30

A. A. TOWNSEND—Natural convection in the earth's boundary layer 51

H. A. PANOFSKY—Scale analysis of atmospheric turbulence at 2 m 57

F. PASQUILL—Some observed properties of medium-scale diffusion in the atmosphere— 70
Discussion 79

Shorter Contributions—

G. STANHILL—The use of the Piche evaporimeter in the calculation of evaporation .. 80

T. H. COOKE—A smoke-trail technique for measuring wind (Plate III) 83

H. ARAKAWA—General trend of the relative humidity of Japan 89

K. R. GABRIEL and J. NEUMANN—A Markov chain model for daily rainfall occurrence at Tel Aviv 90

Y. P. RAO—Transequatorial exchange of angular momentum 96

Correspondence—

C. H. B. PRIESTLEY; A. A. TOWNSEND—Free convection in a wind 100

Discussions—

F. K. BALL—Control of inversion height by surface heating (*Q.J.*, **86**, p. 483) .. 102

R. J. MURGATROYD and F. SINGLETON—Possible meridional circulations in the stratosphere and mesosphere (*Q.J.*, **87**, p. 125) 105

G. B. TUCKER—Precipitation over the North Atlantic Ocean (*Q.J.*, **87**, p. 147) .. 107

G. A. CORBY—Some experiments in the objective analysis of contour charts (*Q.J.*, **87**, p. 34) 109

Proceedings at meetings of the Society 111

Reviews—

Pflanze und Strahlung, F. Sauberer and O. Härtel (J.L.M.); *Late-Pleistocene environments of North Pacific, North America*, C. J. Heusser (D.J.S.); *Encyclopaedic Dictionary of Physics*, Vol. 1 (Ed.) J. Thewlis (B.J.M.); *Handbuch der Geophysik*, Bd. VIII, *Physik der Atmosphäre*, I, (Eds.) F. Linke and F. Möller (B.J.M.); *Maritime meteorology*, G. E. Earl and N. Peter (R.F.M.H.) 114

Obituary Notice 116

Corrigendum 116

K. A. BROWNING and F. H. LUDLAM—Airflow in convective storms (Plates IV-V) .. 117

B. J. MASON and C. W. CHIEN—Cloud-droplet growth by condensation in cumulus 136

B. M. HERMAN—Infra-red absorption, scattering, and total attenuation cross-sections for water spheres 143

B. K. SEN-GUPTA—Large-amplitude periodic lee waves in stratified fluids – Pt. I – Non-linear solution 151

J. FRENKIEL—Wind profiles over hills (in relation to wind-power utilization) .. 156

I. I. GRINGORTEN—Fitting meteorological extremes by various distributions 170

Shorter Contributions—

F. B. SMITH—The effect of sampling and averaging on the spectrum of turbulence .. 177

F. E. DIXON—An 18th century series of pressure readings in Dublin 181

J. E. McDONALD—Large-sphere limit of the radar back-scattering coefficient .. 183

Correspondence—

T. ANDERSSON; G. B. TUCKER—Precipitation over the North Atlantic Ocean .. 187

R. S. SCORER; F. K. BALL—Control of inversion height by surface heating 189

Discussions—

W. T. Roach—Some aircraft observations of fluxes of solar radiation in the atmosphere (*Q.J.*, **87**, p. 346) 191

W. T. Roach—The absorption of solar radiation by water vapour and carbon dioxide in a cloudless atmosphere (*Q.J.*, **87**, p. 364) 192

J. L. Monteith—An empirical method for estimating long-wave radiation exchanges in the British Isles (*Q.J.*, **87**, p. 171) 192

W. Hitschfeld and J. T. Houghton—Radiative transfer in the lower stratosphere due to the 9·6 micron band of ozone (*Q.J.*, **87**, p. 562) 193

F. B. Smith—An analysis of vertical wind fluctuations at heights between 500 and 5,000 ft (*Q.J.*, **87**, p. 180) 195

A. G. Davenport—The spectrum of horizontal gustiness near the ground in high winds (*Q.J.*, **87**, p. 194) 197

Proceedings at meetings of the Society 199

Reviews—

Physics of the Aurora and Airglow, J. W. Chamberlain (G.M.T.); *Annual Report on the Meteorological Office – Jan. to Dec. 1960*, H.M.S.O. (W.A.G.); *Atmospheric diffusion*, F. Pasquill (O.G.S.); *Meteorologie der Strahlströme (Jet Streams)* E. R. Reiter (M.K.M.) 202

Obituary Notices 205

Corrigenda 207

H. L. Penman—Presidential Address—Weather and crops 209

W. L. Godson—The representation and analysis of vertical distributions of ozone 220

J. P. Funk—Radiative flux divergence in radiation fog 233

D. E. Jones and P. Graystone—A note on the equation of mean motion as used in numerical prediction 250

P. Graystone—The introduction of topographic and frictional effects in a baroclinic model 256

A. Foldvik—Two-dimensional mountain waves – a method for the rapid computation of lee wavelengths and vertical velocities 271

M. K. Miles—Wind, temperature, and humidity distribution at some cold fronts over SE. England 286

A. N. Dingle and K. R. Hardy—The description of rain by means of sequential raindrop-size distributions (Plate VI) 301

F. Singleton and W. G. Durbin—Aircraft observations of the horizontal distribution of chloride particles and their relation to drop-growth processes in clouds .. 315

Shorter Contributions—

R. J. Reed—Evidence of geostrophic motion in the equatorial stratosphere 324

N. Thompson—Intensities and spectra of vertical wind fluctuations at heights between 100 and 500 ft in neutral and unstable conditions 328

Correspondence—

N. Sissenwine—U.S. Committee on *Extension to the standard atmosphere* 335

Discussions—

J. Findlater—Thermal structure in the lower layers of anticyclones (*Q.J.*, **87**, p. 513) .. 337

M. H. Freeman—A graphical method of objective forecasting derived by statistical techniques (*Q.J.*, **87**, p. 393) 337

F. H. Bushby and Clare J. Whitelam—A three-parameter model of the atmosphere suitable for numerical integration (*Q.J.*, **87**, p. 374) 338

J. K. Bannon, A. G. Matthewman and R. Murray—The flux of water vapour due to the mean winds and the convergence of the flux over the Northern Hemisphere in January and July (*Q.J.*, **87**, p. 502) 339

E. R. Reiter—Project Jet Stream Research Flight No. 30, April 1957 (*Q.J.*, **87**, p. 332) .. 340

W. C. Macklin—Accretion in mixed clouds (*Q.J.*, **87**, p. 413). The density and structure of ice formed by accretion (*Q.J.*, **88**, p. 30) 342

K. R. May—Fog-droplet sampling using a modified impactor technique (*Q.J.*, **87**, p. 535) 343

Report of the Council for 1961 346

Proceedings at meetings of the Society 360

Award of Napier Shaw Memorial Prize 363

Reviews—

Mesures en Météorologie, A. Perlat and M. Petit (W.E.K.M.); *Das Klima der Vorzeit*, M. Schwarzbach (G.M.); *Quellentexte zur Witterungsgeschichte Europas von der Zeitwende bis zum Jahre 1850. Hydrographie*, C. Weikinn (G.M.); *Atmosphärische Elektrizität, Teil II*, H. Israel (J.A.C.); *Chemical reactions in the lower and upper atmosphere*, Proceedings Internat. Symposium. Stanford Research Inst. (F.H.L.); *Space Research II*, Proceedings Second Internat. Space Sci. Symposium, Florence (P.A.S.); *The Planet Saturn*, A.F.O'D. Alexander (D.G.K.-H.); *Précis de climatologie*, Ch. P. Peguy (N.P.) .. 364

Obituary Notices 368

G. D. Rochester—Symons Memorial Lecture for 1962 – Cosmic rays and meteorology 369

P. G. Saffman—The effect of wind shear on horizontal spread from an instantaneous ground source 382

W. S. Hall—The rise of an isolated thermal in wind shear 394

J. S. Sawyer—Gravity waves in the atmosphere as a three-dimensional problem .. 412

B. K. Sen-Gupta—Large-amplitude periodic lee waves in stratified fluids – Pt. 2 – Linear theory 426

W. M. Gray—On the balance of forces and radial accelerations in hurricanes .. 430

R. H. Clarke—Pressure oscillations and fallout downdraughts (Plates VII-VIII) .. 459

C. E. Wallington—The use of smoothing or filtering operators in numerical forecasting 470

J. R. Probert-Jones—The radar equation in meteorology 485
